Workspace(s): Legacy (Geopak) and Enhanced (OpenRoads)

Impacts: Signed/Sealed Plans for Contract

Update Reference Number(s): CU-5036, CU-5047, CU-10302, CU-10319, CU-10326

Update

MDT recently moved to digitally signed plans for all contracts.

Adjustments to the signature blocks for the Highways Engineer, Bridge Engineer, Traffic and Safety Engineer, Consultant Design Engineer, Preconstruction Engineer and Environmental Services Bureau Chief have been made to accommodate DocuSign signatures. The changes allow a larger area for the digital signature and revised formatting for the date. The signature block is expected to automatically display the updates for all title sheets but there may be some exceptions.

Additionally, the FHWA signature was determined to not be required on plans when not in use. The bottom portion of the signature block reserved for FHWA signature has been moved to alternate levels that can be turned on when needed. The levels are in the MDT standard reference file named **S_SHEETS-RDTTL-FHWA Frame** and **S_SHEETS-RDTTL-FHWA Text**.
