MDT BrM External User Access

1. An Okta account is needed to log in to BrM. If you don't have one, you can create one here: https://okta.loginmt.com

2. Use the following link to access MDT's BrM: https://mdt.promiles.com/BrM7/

   Select **Login with SSO** to sign in and enter your Okta username and password when prompted.

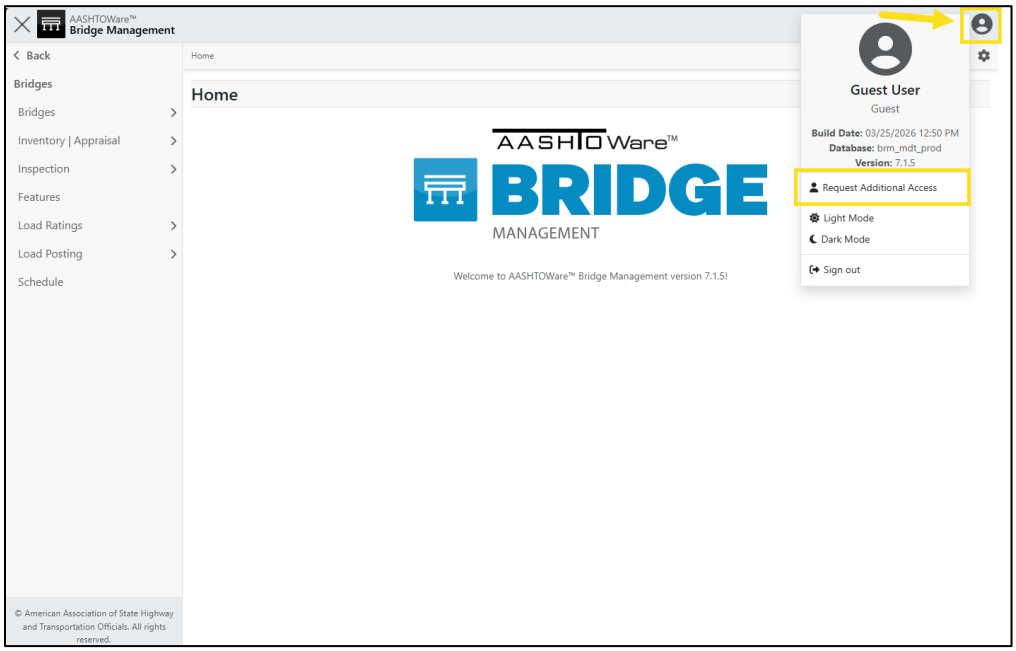

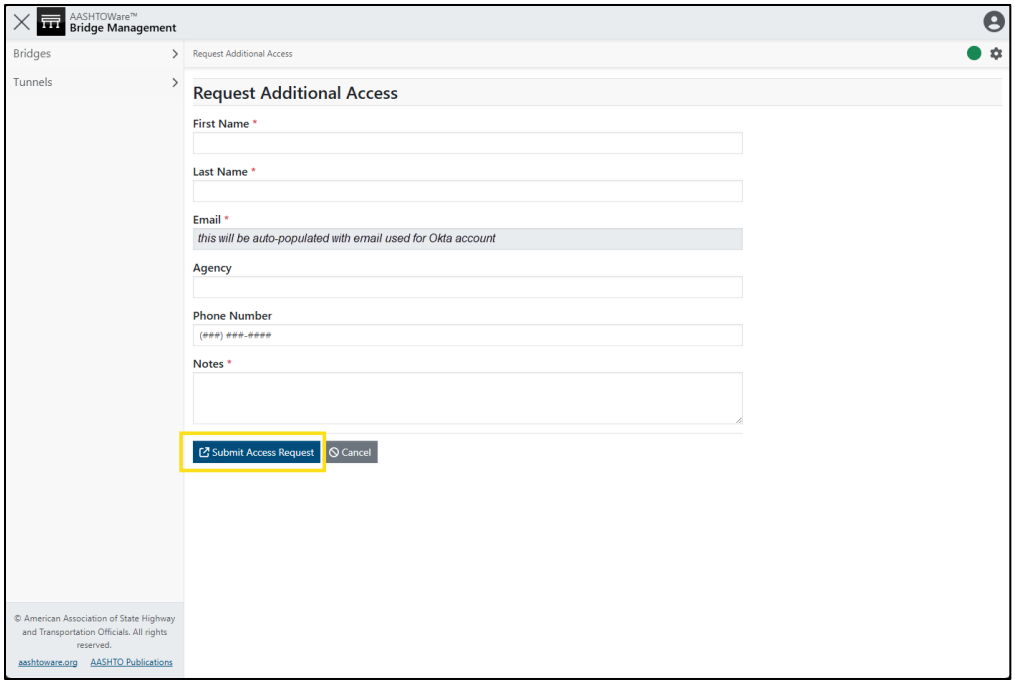

3. If other access has not been granted, users are signed in as "Guest User" with basic read-only access.

4. If additional access is needed, you can request by clicking the icon in the upper right corner of the screen and selecting **Request Additional Access** in the menu (see image on next page).

   a. Fill out the fields and submit by selecting the **Submit Access Request** button at the bottom of the screen.

   b. Fields with a red asterisk are required. Please include a brief explanation of additional access needs in the Notes section, including project or contract number (if applicable).

5. Your request will be routed to MDT's Bridge Management team for review and approval. Once approved, the icon in the upper right will show your name instead of "Guest User".

6. If you have any questions, please contact mdtbridgesmssupport@mt.gov.
