Using the Command 3

OVERVIEW

The **DWG Clean** command cleans a drawing file by fixing errors and removing unused and/or unseen objects. A clean drawing will open and save quicker, use less memory, and perform faster.

The **DWG Clean** command is developed and provided by MDT.

USING THE COMMAND

1. Type **MDTDWGCLEAN** at the command line or press the **DWG Clean** ribbon button.
2. A dialog will appear.
   This drawing will be saved during the DWG Clean process; Do you want to continue? Yes or No?
    a. Click “Yes” to continue.
        i. Drawing will be audited to fix errors.
        ii. Zero-length geometry, empty text objects, orphaned data, and unreferenced registered applications (regapps) will be removed.
        iii. Click “OK” to exit.
        iv. (Optional) Press **<F2>** on keyboard to open the AutoCAD Text Window to see results.
    b. Click “No” to cancel.
        i. Process will be cancelled. Command will exit.
