Using the Command 3

OVERVIEW

The **MDT Components** panel allows to quickly insert MDT CADD standards drawing components into a drawing. The commands allow to easily update a drawing with the latest MDT CADD standards drawing components or quickly insert missing components into a drawing.

The **MDT Components** panel commands are developed and provided by MDT.

USING THE COMMAND

1. **Refresh All MDT Components** is the default button command. The button has a dropdown menu to select each of the individual drawing component commands.
    a. **Refresh All MDT Components** adds all available MDT AutoCAD drawing components at once. (Command line: **MDTADDALLCOMP**)
    b. **Restore Layer Defaults** will restore all MDT layer property settings in a drawing to the default MDT standards. (Command line: **MDTADDSLS**)
    c. **Add Layers** will add all MDT layers to a drawing. (Command line: **MDTADDALLLAYERS**)
    d. **Add Layer Filters** will allow to select an MDT layer filter list to import into the drawing. (Command line: **MDTADDLFT**)
    e. **Add Linetypes** will add all MDT linetypes to a drawing. (Command line: **MDTADDLTYPES**)
    f. **Add Textstyles** will add all MDT textstyles to a drawing. (Command line: **MDTADDTSTYLES**)
    g. **Add Dimension Styles** will add all MDT dimension styles to a drawing. (Command line: **MDTADDDSTYLES**)
    h. **Add Multileader Styles** will add all MDT multileader styles to a drawing. (Command line: **MDTADDMLEADERS**)
    i. **Add Table Styles** will add all MDT table styles to a drawing. (Command line: **MDTADDTABLES**)
2. The last selected command becomes the new default button command. All commands are always available via the dropdown menu.
