Using the Command 3

OVERVIEW

The **Pipe Separation at Structure** command checks the minimum chord distance between pipes at the inside wall of a cylinder structure. (Chord distance is slightly more conservative than distance along the wall.)

USING THE COMMAND

1. Type **MDTPipeSeparationAtStructure** at the command line or press the **Pipe Separation at Structure** ribbon button.
2. Select a cylinder pipe network structure that has multiple connected pipes.
3. The minimum pipe separation value will display in the command line.
4. Select additional structure(s) to check or press **<enter>** to exit.
